ESAP Clinical AI

Cost Estimate — Running & One-Time Costs

All amounts in USD · VAT 15% · November 2026

Key figures

$19,795	$207,100	$444,640	$511,336
Monthly cost 1 hospital (excl. VAT)	One-time cost 1 hospital (excl. VAT)	Year-1 total 1 hospital (excl. VAT)	Year-1 total 1 hospital (incl. VAT)

This document summarises the estimated cost of running ESAP Clinical AI: the current US demo (per individual user) and the Saudi hospital deployment (total and per hospital). Monthly costs exclude one-off approvals so they are not counted twice; one-time costs are shown separately.

1. Cost per individual user — US demo

Synthetic data only; this setup is US-hosted and is not used for Saudi patient data.

Users	Monthly (excl. VAT)	Monthly (incl. VAT)	One-time	Year-1 total (excl. VAT)	Year-1 total (incl. VAT)
100	$1.37	$1.58	$0	**$16.44**	**$18.91**
200	$0.79	$0.90	$0	**$9.42**	**$10.83**
500	$0.59	$0.68	$0	**$7.13**	**$8.20**

Demo total per month: $137 / $157 / $297 (excl. VAT) → $157.55 / $180.55 / $341.55 (incl. VAT).

2. Cost per hospital — Saudi deployment

2a. Total cost (all hospitals together)

Hospitals	Monthly (excl. VAT)	Monthly (incl. VAT)	One-time (excl. VAT)	One-time (incl. VAT)	Year-1 total (excl. VAT)	Year-1 total (incl. VAT)
1	$19,795	$22,764	$207,100	$238,165	**$444,640**	**$511,336**
5	$28,015	$32,217	$307,100	$353,165	**$643,280**	**$739,772**
10	$37,965	$43,660	$432,100	$496,915	**$887,680**	**$1,020,832**

2b. Cost per hospital (total ÷ number of hospitals)

Hospitals	Monthly (excl. VAT)	Monthly (incl. VAT)	One-time (excl. VAT)	One-time (incl. VAT)	Year-1 total (excl. VAT)	Year-1 total (incl. VAT)
1	$19,795	$22,764	$207,100	$238,165	**$444,640**	**$511,336**
5	$5,603	$6,443	$61,420	$70,633	**$128,656**	**$147,954**
10	$3,797	$4,366	$43,210	$49,692	**$88,768**	**$102,083**

One-time = $169,100 company approvals (paid once) + $38,000 first hospital setup + $25,000 per extra hospital. Year-1 total = 12 × monthly + one-time; assumes all hospitals are live for the full year.

2c. Why the cost per hospital drops

- **Total cost rises, but slowly:** 4 extra hospitals add only $8,220/month ($19,795 → $28,015).
- **Most monthly cost is fixed:** security & compliance, SFDA/QMS upkeep, the operations team and hosting are needed for 1 hospital or 10. Only integration support grows fully ($1,000 per hospital).
- **Most one-time cost is paid once:** the $169,100 approvals are shared by all hospitals; each extra hospital adds only $25,000 setup.
- **Result:** one hospital carries all fixed cost alone; at 5 hospitals each pays about one quarter of it.

3. Monthly running cost breakdown (excl. VAT)

Item	1 hospital	5 hospitals	10 hospitals
Hosting (Saudi cloud, CST-licensed)	$1,500	$2,120	$3,320
LLM / GPU (own Qwen3.5-9B; 2nd GPU from 5 hospitals)	$850	$1,700	$1,700
Security & compliance (pentest, DPO, insurance, legal)	$6,720	$7,470	$8,720
Approvals upkeep (SFDA rep, QMS, post-market)	$2,725	$2,725	$3,225
Hospital integration support ($1,000 per hospital)	$1,000	$5,000	$10,000
Operations team (DevOps + support)	$7,000	$9,000	$11,000
Total / month	**$19,795**	**$28,015**	**$37,965**

4. One-time cost breakdown (excl. VAT)

Item	Cost	Note
SFDA approval (consultant, technical file, fee)	$73,100	Official fee SAR 19,000–21,000
ISO 13485 QMS (consultant + audit)	$47,000	Required for SFDA
Silent pilot study	$30,000	Clinical evidence for SFDA
NCA security gap fix + policy pack	$15,000	
Arabic translation / legal pages	$4,000	
Company total (paid once)	**$169,100**	
Hospital setup (integration, IRB, recalibration, training)	$38,000 first $25,000 each next	Per hospital

5. Price & margin

	1 hospital	5 hospitals	10 hospitals
Price / hospital / month (excl. VAT)	$8,500	$8,500	$8,500
Cost / hospital / month (incl. one-offs spread over 36 months)	$24,492	$6,542	$4,266
Margin	**–188%**	**23%**	**50%**
Setup fee / hospital	$40,000	$40,000	$40,000

Price $8,500 = SAR 31,875 per hospital per month, excl. VAT.

Notes & assumptions

- Break-even at approximately **4 hospitals**. No clinical revenue before SFDA approval; the first hospital is a discounted pilot.
- Cash needed before the first paying hospital: approximately **$385,000 (SAR 1.44M)**.
- "Incl. VAT" assumes 15% on all items; government fees (e.g. the SFDA fee) may be VAT-exempt.
- All figures are estimates. Obtain 2–3 quotes for Saudi cloud/GPU, DPO, pentest, insurance and consultants before commitment.
- Exchange rate: 1 USD = 3.75 SAR.
